Base Assembly

1. 2. 
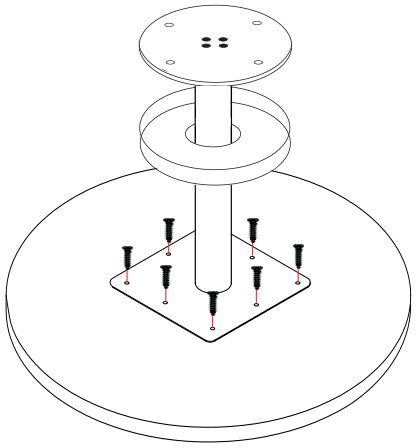
Table Assembly



ATTENTION: <u>Due to sensitive nature of the stainless steel, use extreme care when assembling a base to avoid accidental dents and scratches.</u>

Instructions

Base Assembly

1. Place mounting plate on the top of a column with 3 holes. Insert lock washers inside the hex head bolts. Start 3 hex head bolts with lock washers inside by hand first, then tighten with a hex wrench.
2. Turn the base over and set mounting plate on the floor. Gently slide the cover shroud through the column with the edges facing up. Place the center of the steel plate on the column and align the holes. Use the remaining 4 flat head bolts to secure the plate. Tighten the bolts with the hex key.

Table Assembly

1. Lay table top upside down on cardboard or carpeted surface.
2. Position assembled base in the center of the table top or align holes in mounting plate with pre-drilled holes in the top. Use wood screws to attach the top. Use every hole in the mounting plate.
3. Holding onto the edges of the top, carefully turn the table over in the upright position.
4. Bolt the base down to the floor (hardware is not provided).
5. Use stainless steel cleaner and soft cloth to remove finger prints or stains from the base. Enjoy your table!
