

A Table for Every Environment **Description**

The new Structure collection was designed with the total environment in mind. Whether it be office, educational or institutional, Structure offers a product for every application. Aesthetically, Structure presents a clean, elegant look that complements a wide variety of interiors. It's sturdy. With its welded 14 gauge, rectangular steel it's built to last, yet it presents as minimalistic. Structure brings to market design, durability and performance at a price that is substantially less than other products of its class.
