Convertible

Our sleekly designed Convertible is constructed with space efficiency in mind. It offers a flexible and mobile solution that allows an every-day office area to be converted quickly and easily from one application to another. Convertible incorporates a top that can be tilted, resulting in a vertically stacking table. Its unique structure allows straight-on nesting in the flipped position. Each table takes up only 4.5" of space. Single point release mechanism is simple to use when flipping any size top. Locking skate casters are standard for easy mobility and a heavy duty beam prevents the top from sagging.

Modesty Panels

Three types of modesty panels are available for our training room tables. All panels are 10” high and 1/4” shorter than the table top.

**Perforated Steel Modesty Panel** permanently mounts directly to the top. It features 19 gauge steel with perforated front. Perforation pattern is 3/16” diameter round holes spaced 1-¾” apart. Depending on the size, each panel has two or three cable cutouts located on the top of the panel. They allow wires to pass into the oversized wire channel that runs through the bottom of the modesty panel.

**Laminate Modesty Panel** features a laminated ¾” thick panel that permanently mounts to the top with corner brackets. Choose from a large selection of laminate colors to complement your design.

**Folding Laminate Modesty Panel** is ideal for folding table applications. The panel is constructed from ¾” thick particle board and high pressure laminate. It is easily folded by pressing on the folding mechanism latch to make positive locking connection at both the open and closed positions.

Wire Management

**Double Panel Wire Manager** features two perforated steel panels with an opening in the middle for wire management. Available with: Arcade, Apollo, Carina and Bridget tables.

**Table Leg Wire Manager** is a half-moon shaped channel with adhesive tape to attach to a table leg.

**Large J-Shape Wire Manager** is designed to fasten with adhesive tape under a table to keep cables up and out of the way. Ideal for laminate modesty panels.

Table Connectors

**Quick Align Table Connector** features heavy duty metal plate with plastic knobs. It is designed for pain-free table connections when frequent table reconfigurations are required.

**Quick Release Table Connector** is a 12” x 4” steel plate with 4 knobs screwed into a top. It operates by tightening knobs once a plate is moved under the tables to be connected.
Folding and Flip Top Option

A folding option is available for some tables. It allows legs to lay flat against the table top. Skillfully engineered folding mechanism operates by pushing the lever at both open and closed positions. Available with: Arches, Kingston, Apollo and EZ-Roll.

A flip top option features the Quick-Flip mechanism allowing a table top to flip into a vertical position by pulling on the release handle. Tops locks automatically when returned to the horizontal position. Available with: Kingston, ClassiX, Fusion and Trion.

Other Options

Skate Caster is an upscale 3” inline locking caster. Available with: Arches, Kingston, Apollo, Delta, Robot, Fusion and Bedford.

Dual Wheel Caster is a 2” hooded locking caster. Available with: Kingston, Apollo, Elia, ClassiX and Bedford.

Self Leveling Glide automatically stabilize tables on uneven floors. It is easy to install and requires no adjustment. Available with: ClassiX, Fusion, Success, Disco, Cantina, StarX and Bedford.

Perforated Panel adds a sophisticated design look. Available with: Arcade, Apollo, Carina and Bridget.

Laminate Insert offers a unique design detail and is optional for the Legacy table. It features a piece of any Standard Wilsonart laminate inserted inside and around the drum bases.

Adjustable Height tables adjust in 1” increments by depressing a spring clip pin. The pin snaps back into a locking position when realigned with the outer column holes. Thumb screw locks table legs in position. Available with: Arches, Arcade, Kingston, Apollo and Robot.
Power and Data

**GLENBEIGH** features two openings with power or data for either one. It is constructed of durable die-cast zinc and available in 8 colors that complement a wide range of decor. Select from plug or hard wire connection options.

**MHO** offers flexible desktop power and data solutions for executive and institutional work station applications. Retractable and constructed out of durable die-cast zinc, the modular high output convenience outlets are highly functional with a fluid, one touch door that remains open during use. MHO features four openings for power and data ports. Select from plug or hard wire power options.

**MINIPORT** features fluid one touch action door with two power and two data openings. Made out of high density plastic and available as a single unit with standard 6’ cord or as INTERLINK option allowing linking up to 8 modules on multiple tables.

**SPHERE** made out of high density plastic. It provides two simplexes to accept standard power cords or AC adapters and provides two ports for the installation of voice/data.

**SMART-LINK** a non-sequential power distribution system allows user to link up to 8 tables together with a single electrical connection. It is available with Glenbeigh, MHO, and Miniport modules and has either plug or hardwire power options. For more power and data options, call Customer Service at 888-705-0777.

---

**Standard Table Features**

Special-T tables are manufactured from the highest quality products possible meeting or exceeding ANSI/ BIFMA standards.

**Table tops** feature 1-1/8” thick 45 lb. density particle board core, high pressure laminate, durable vinyl, wood or urethane edges, and .038 balanced backer sheet on less than 48” tables (.038 phenolic backer equal or greater than 48”). The finished top thickness is 1-1/4”.

High quality high pressure Standard Wilsonart **laminate** is applied to all our tops. Premium laminates are available for an additional charge.

A wide selection of **table edges** and **edge colors** is available. The edges include durable vinyl, wood and urethane edges.

Most tops are **pre-drilled** for easy installation. To prevent tops from sagging, all tables 60” or longer that are sold without a continuous beam base include a **steel table support**.

The **table legs** are fabricated from high quality tubular steel, stainless steel or cast iron. All tubular steel bases are available in eighteen powder coat finishes at standard price. Color matching available. Upcharge may apply. Some bases are also available in polished chrome and stainless steel finish. Leveling glides are standard for most tables. Table legs ship knocked down and are easy to assemble.

The standard table height is 29”.

Special-T’s dedication to the future of our environment is demonstrated in our products. **Special-T** product has passed MAS Certified Green™ Indoor Air Quality stringent testing and is compliant with BIFMA X7.1, LEED, CDPH and CHPS standards*.

(*Wood edges are not MAS Certified Green™)

Special-T offers a **5 Day Quick Ship** program for any rectangular or square table to ship in 5 business days after acknowledged date. Choose from five Quick Ship laminates and edge colors used in any combination. All edges are square corner 3mm PVC edge (-P3).
