### Parts Included:

- (1) Packet of hardware:  
wood screws
- (2) Bases
- (1) Table support

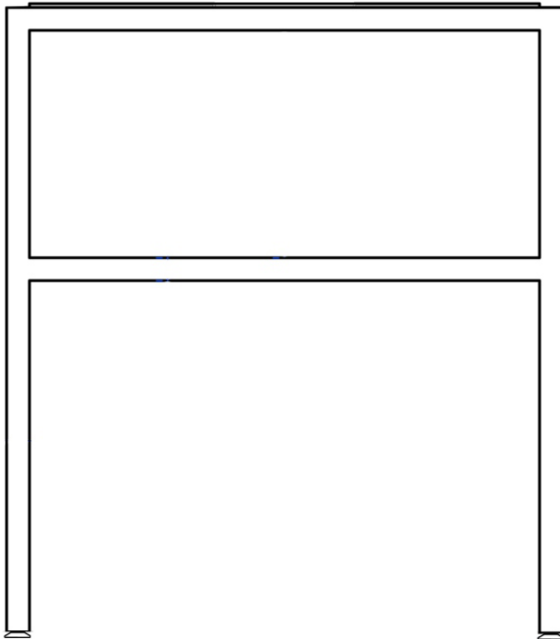

(2) Bases

### Tools Needed:

- Phillips screwdriver or impact drill
- 3/8" hex bit
- #3 Phillips bit
- Safety glasses

### RSHL

### Instructions

1. Lay table upside down on cardboard or a carpeted surface.
2. If table support is provided, align it in the center of the table top and secure with 1" metal sheet screws.
3. At each end of the table top, position the bases and align holes in mounting plate with predrilled holes in table top.
4. Using 3/8" hex bit and impact drill, install 1" metal sheet screws from hardware pack through the base mounting plates and into pre-drilled holes in table top.
5. Flip table upright and adjust leveling glides if necessary. Enjoy your table!
