G
Caster
Optional
(4)

1-4

BASE ASSEMBLY

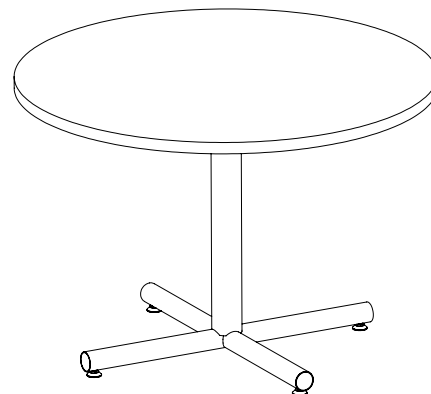

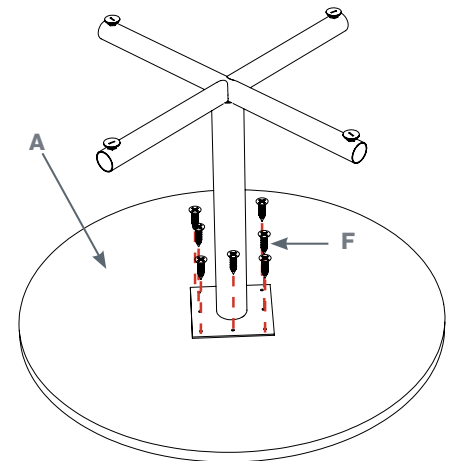

1. Place the welded x-foot on the floor with the glides down.
2. Set the column tube on top of the x-foot in the center.
3. Set the mounting plate on top of the column so that the small tabs on the column align with the holes in the mounting plate.
4. Insert the threaded rod through the center of the mounting plate and down through the column tube. Use the 19mm socket and wrench to tighten the threaded rod.

1-4

TABLE ASSEMBLY

1. Place the tabletop upside down on a soft surface to prevent scratching.
2. Place the base on the tabletop with the mounting plate facing the underside of the tabletop. Align the pre-drill holes on the tabletop with the holes in the mounting plate.
3. Use the impact drill and #3 Phillips bit to install ALL of the table screws provided.
4. Remove pre-installed glides and install optional casters using the 13mm wrench if necessary.
