	<p>Microfiber Cleaning Cloth</p>
	<p>180 Grit Sandpaper Blocks (for edges only)</p>
	<p>Craftics Edge Scraper (for edges only)</p>

PET Screens

PET can be safely cleaned with most non-abrasive cleaners, like:

- Disinfecting wipes
- Disinfecting sprays
- Mild soap
- Bleach solution: 1/3 cup of bleach per 1 gallon of water

Follow the bleach manufacturer's instructions for application and proper ventilation. Never mix household bleach with ammonia or any other cleanser.

Plexiglass, Acrylic, and Acrylite

Plexiglass, Acrylic, and Acrylite are durable materials that require minimal maintenance. Regular care should consist of normal wipe-cleaning with a soft rag or towel. Pay special attention to avoid scratching the surface.

CAUTION

Using window cleaner, ammonia products, bleach, or other chemical sprays on Acrylic, Plexiglas or Lucite can cause permanent damages. If there is any adhesive or sticky substance on the surface, DO NOT use any solvents.

Clean with a nonabrasive acrylic cleaner, such as Brilliantize or Novus No. 1. It leaves a lustrous shine that resists fogging, repels dust, and eliminates static. Novus also offers a Fine Scratch Remover (Novus #2) that removes fine scratches, haziness, and abrasions from most plastics. For heavy scratches, use the Heavy Scratch Remover (Novus #3) which removes heavy scratches and abrasions from most acrylic surfaces. For an on-hand alternative, a solution of mild dish soap and water works well too.
